Marble Home

The desire to protect oneself in an archetypal space of magical proportions. A home of wood and stone, structured with wood and highlighted by the grey veins of the stone, offset in the sequence of perfectly identical shingle modules for the walls and roof. A module for 120 pieces of Striato Olimpico (name of stone species), decorated with "buttons" in Nero Marquina (name of stone species).

这是一座大理石房子原型，设计师利用木材作为建筑框架，大理石作为屋顶和墙体材料。“房子”共用120块大理石搭建而成，每块大理石上还镶嵌了一颗黑色的“纽扣”。
