

## **Tomàs Alonso**

**"Monoblock is a set of dining, work, and small serving tables designed around wood and marble that explores the different ways in which these materials can be combined. The fitting system is designed with flexibility and ease of movement in mind; after removing the tabletop, the metal fitting element can also be used as a handle for the marble bases, thereby facilitating handling. The inspiration for this project was my visit to the factory, in Puglia, with which I was to collaborate in order to see where and how stone is processed and to discover new technologies. Another important factor for me was the attempt to obtain the maximum from the very properties of the stone itself – its strength, its weight and its workability – and incorporate them in a functional way within the project."**

桌子系列选用了木与大理石作为材料，设计师在考虑这两种材料结合的可能性花了很多工夫。可活动的桌面设计，为因选材大理石而显得沉重的设计赋予了灵巧的个性。设计师希望这款设计能够尽量将大理石的特性发挥，它的坚实、重量以及实用性，将之变成一件多功能的实用品。
